\*Based on supplementary classification of external causes of injury and poisoning (E-codes). In 2004, one in eight inpatient discharges for injury (7,514) did not have an external cause code. The E-codes are available for 51,566 among the 59,080 inpatient discharges for injury. See footnotes to Table 4D-1 for ICD-9-CM codes used to define specific mechanism and/or intent of injury.
