ADVANCE VITAL STATISTICS BY COUNTY OF RESIDENCE ARIZONA, 2008

June 2009

PREFACE

This report provides readers with the statewide and county-level vital statistics information for 2008. It is provided in advance of the publication of "*Arizona Health Status and Vital Statistics, 2008*". The latter, complete yearly report will be available towards the end of 2009.

The source documents for the data presented in this report are 2008 vital records: Certificates of live births, certificates of deaths and fetal death certificates filed with the Arizona Department of Health Services on or before May 15, 2009. Information on abortions is compiled from reports sent by providers within the state. The counts of marriages and dissolutions of marriage are reported monthly by the Clerk of the Superior Court of each county in which the marriage or dissolution of marriage occurred.

The first part of this report presents a summary of pregnancies by pregnancy outcome, births and deaths, spontaneous and induced terminations of pregnancy, marriages and marriage dissolutions for the state and by county in 2008.

The second part focuses on selected demographic and prenatal care characteristics of the women giving birth (age group, marital status, trimester of entry into prenatal care, party paying for the delivery, number of prenatal visits) and the incidence of low-birthweight.

The third part addresses cause-specific and age-specific mortality by county, urban/rural region and ethnic group in 2008.

The fourth part of the report provides population denominators for 2008 by age group and county of residence. The 2008 population denominators assume that Arizona grew by 1.6 percent from 6,432,007 residents in 2007 to 6,534,921 in 2008. The slowest rate of population growth since 1990 was combined with an unprecedented decrease of 3.4 percent in the number of resident births (the only decrease since 1991). Hispanics or Latinos experienced a 6.8 percent decrease in the number of births. Our estimates take into account the decrease in the number of resident births and its impact on the estimated size of the population <1 year of age. In addition, the 2008 estimates are based on the assumption that factors affecting the population growth such as the number of illegal residents who had been driven out of the state, the decline in construction jobs, the number of foreclosures, the number of built but vacant homes, the decline in the number of resident births, etc., all apply primarily to metropolitan, not rural, counties. Our estimates of the total population of Apache, Cochise, Coconino, Gila, Graham, Greenlee, La Paz, Navajo, Santa Cruz, and Yuma counties agree with the 2008 population estimates developed by Population Statistics Unit in the Arizona Department of Commerce. Our estimates for Maricopa, Mohave, Pima, Pinal, and Yavapai counties are lower than the estimates of the Population Statistics Unit. The estimated total of 6,534,921 residents of Arizona in 2008 is similar to the latest estimate from the U.S. Census Bureau (6,500,180) but it is substantially lower than the Population Statistics Unit estimate of 6,629,455.

It is hoped that this advance vital statistics report will be a valuable resource for public health and other professionals until the full annual report is available. The online version of "*Advance Vital Statistics by County of Residence, Arizona, 2008*" is available at
