Cumulative number of mothers 19 or younger	0	3	31	234	1,091	3,111	5,559	6,621	6,506	4,344	27,500

NOTE: The above table focuses on the 2001 cohort of Arizona mothers who were 19 or less years old that year. Among them are those who:

- gave birth to the 11,790 babies in 2001
- gave birth to a baby prior to 2001 and were still 19 or less years old in 2001.

The numbers below the main diagonal (and below the stair-like line) represent the number of mothers meeting either one of the above criteria. The last column to the right gives the cumulative total for 2001 by the year baby was born. For example, from among those girls and adolescents who had their baby in 1995, 38 remained in their teens in 2001. The bottom row gives the cumulative total by mother's age when baby was born. For example, among the 27,500 mothers under 20 in Arizona in 2001, 1,091 had given birth when 14 years old.

Excluded from the cumulative totals and not shown above the main diagonal (and above stair-like line) are the numbers of mothers who were 19 years old when the baby was born, but who were no longer under the age 20 by 2001. For example, mothers who were 11 years old in 1991 were 20 years old in 2001.

The figures in Table 26 are unadjusted for in-and-out migration, as well as mortality of mothers, in the period of 1992-2002.
