Note: Due to reporting delays, all numbers are provisional (2007 volume as of 5/20/2008). Due to the transition to a new (EHARS) data system provided by the Centers for Disease Control in 2/08, classification of some cases may have changed. During the data transition, some cases were re-classified into other categories when conflicting, or erroneous information were found to exist. These changes should not be interpreted as meaningful changes in trends within the HIV/AIDS epidemic.
