<sup>1</sup>Number of infant deaths per 1,000 live births in specified ethnic/gender group. Infant deaths are by the race/ethnicity of the decedent. For consistency with the national data, the denominators used to calculate infant mortality rates were changed from race/ethnicity of parents to race/ethnicity of mother as stated on the birth certificate. The change in the basis for calculating infant mortality rates results in lower rates for white infants and higher rates for most minority infants than when they are computed by the previous method.

<sup>2</sup>Includes records with other and unknown ethnic group.
