ADVANCE VITAL STATISTICS BY COUNTY OF RESIDENCE ARIZONA, 2007

by

Christopher K. Mrela, Ph.D., *Arizona Vital Statistician*
Clare Torres, *Senior Health Data Analyst*

June 2008

PREFACE

This report provides readers with the statewide and county-level vital statistics information for 2007. It is provided in advance of the publication of "*Arizona Health Status and Vital Statistics, 2007*". The latter, complete yearly report will be available towards the end of 2008.

The source documents for the data presented in this report are 2007 vital records: Certificates of live births, certificates of deaths and fetal death certificates filed with the Arizona Department of Health Services on or before April 30, 2008. Information on abortions is compiled from reports sent by providers within the state. The counts of marriages and dissolutions of marriage are reported monthly by the Clerk of the Superior Court of each county in which the marriage or dissolution of marriage occurred.

The first part of this report presents a summary of pregnancies by pregnancy outcome, births and deaths, spontaneous and induced terminations of pregnancy, marriages and marriage dissolutions for the state and by county in 2007.

The second part focuses on selected demographic and prenatal care characteristics of the women giving birth (age group, marital status, trimester of entry into prenatal care, party paying for the delivery, number of prenatal visits) and the incidence of low-birthweight.

The third part addresses cause-specific and age-specific mortality by county, urban/rural region and ethnic group in 2007.

The fourth part of the report provides population denominators for 2007 by age group and county of residence. Two data sources were utilized in producing the 2007 population estimates. The totals for the State and each of its counties agree with the projections released by the Department of Economic Security (DES) on March 31, 2006 (<http://www.workforce.az.gov/?PAGEID=67&SUBID=138>). The percentages of population breakdowns by single-year of age, gender and race/ethnicity were derived from the "Bridged-Race Vintage 2006 Postcensal Population Estimates for Calculating Vital Rates", available from the National Center for Health Statistics (NCHS: <http://www.cdc.gov/nchs/about/major/dvs/popbridge/datadoc.htm#vintage2006>). These percentages were then applied to total state and county population projections for 2007 from DES.

It is hoped that this advance vital statistics report will be a valuable resource for public health and other professionals until the full annual report is available. The online version of "*Advance Vital Statistics by County of Residence, Arizona, 2007*" is available at

<http://www.azdhs.gov/plan/report/avs/>

Note: Two data sources were utilized in producing the 2007 population estimates. The totals for the State and each of its counties agree with the projections released by the Department of Economic Security (DES) on March 31, 2006 (<http://www.workforce.az.gov/?PAGEID=67&SUBID=138>). The percentages of population breakdowns by single-year of age, gender and race/ethnicity were derived from the "Bridged-Race Vintage 2006 Postcensal Population Estimates for Calculating Vital Rates", available from the National Center for Health Statistics (NCHS: <http://www.cdc.gov/nchs/about/major/dvs/popbridge/datadoc.htm#vintage2006>). These percentages were then applied to total state and county population projections for 2007 from DES.
