# PREFACE

This report provides readers with the statewide and county-level vital statistics information for 2009. It is provided in advance of the publication of "*Arizona Health Status and Vital Statistics, 2009*". The latter, complete yearly report will be available towards the end of 2010.

The source documents for the data presented in this report are 2009 vital records: Certificates of live births, certificates of deaths and fetal death certificates filed with the Arizona Department of Health Services on or before May 15, 2010. Information on abortions is compiled from reports sent by providers within the state. The counts of marriages and dissolutions of marriage are reported monthly by the Clerk of the Superior Court of each county in which the marriage or dissolution of marriage occurred.

The first part of this report presents a summary of pregnancies by pregnancy outcome, births and deaths, spontaneous and induced terminations of pregnancy, marriages and marriage dissolutions for the state and by county in 2009.

The second part focuses on selected demographic and prenatal care characteristics of the women giving birth (age group, marital status, trimester of entry into prenatal care, party paying for the delivery, number of prenatal visits) and the incidence of low-birthweight.

The third part addresses cause-specific and age-specific mortality by county, urban/rural region and race/ethnic group in 2009.

The fourth part of the report provides population denominators for 2009 by age group and county of residence. The estimated total population of Arizona in 2009 (6,595,778) agrees with the U.S. Census Bureau estimate released in December 2009 (Table 1. Annual Estimates of the Resident Population for the United States, Regions, States, and Puerto Rico: April 1, 2000 to July 1, 2009; NST-EST2009-01). The percentages of population breakdowns by age, race/ethnicity, gender, and county of residence were derived from our own population denominator database for 2008. These percentages were then applied to the estimated total state population for 2009 from the U.S. Census Bureau. The size of the population <1 year of age was adjusted down, to correspond with a substantial decrease in the number of resident births in 2009.

It is hoped that this advance vital statistics report will be a valuable resource for public health and other professionals until the full annual report is available. The online editions of "*Advance Vital Statistics by County of Residence in Arizona*" for 1999–2009 are available at:
