Notes: * Cell suppressed due to non-zero count less than 6; † Sum rounded to nearest tens unit due to non-zero addend less than 6; We have used the estimates from the American Community Survey for Arizona to obtain the 2023 population denominators by category of marital status and gender among persons 15 and over. Please note that death record marital status categories include never married (single), married, widowed, divorced, and unknown. Although somewhat similar, the categories are not a complete match to the U.S. Census American Community Survey categories which include never married, now married (except separated), separated, widowed, and divorced. Due to the discrepancy, the table only represents matching categories and excludes counts from the separated category found only in the census data. The suicide rates in the above table are unadjusted for differences in the age composition. Both the age-specific and age-adjusted suicide rates by marital status and gender are available for 2023 at:
